Re: Proposed Loveland-Miamiville Wastewater Treatment Facility

Dear Stakeholder:

BBS Corporation has been commissioned by the Clermont County Board of County Commissioners to design the proposed Loveland-Miamiville Wastewater Treatment Plant. Their initial task is to conduct a review of previously proposed sites for the facility to assure that all appropriate and relevant concerns are addressed.

As an independent firm, they have no preconception of the appropriateness of any proposed sites. Their responsibility is to consider the issues at each proposed site and submit a recommendation to the Board. With that goal, we are proposing a facilitated workshop to be held on May 13, 2004, 9:00 AM at the Clermont County Engineering Department, 2381 Clermont Center Drive, Batavia, Ohio 45103. A representative of your organization is invited to attend and participate in the workshop. Each organization invited will be limited to one representative. Presentations will be made by representatives from BBS Corporation and the regulatory community concerning the location of the proposed plant and associated collection and conveyance facilities. During the workshop, all previously proposed sites will be discussed and, as a group, we will determine what factors should be considered and how those factors should be given weight in the final analysis. The outcome of the meeting will not be to select a site, but to determine the criteria which will be used to select the site.

An independent facilitator will be provided to maintain focus and assure that all relevant issues are presented fairly and that the development of criteria will be done in an equitable manner. We request that you provide the name of your attendee to us no later than May 7, 2004.

Thank you for assistance in this matter. We look forward to meeting with you on May 13, 2004. In the interim, should you have any questions, please call me at 513-732-7230.

Sincerely,

Lyle G. Bloom, P.E.

Cc BBS Corporation
